DSCI CONSOLIDATES ITS IA OPERATIONS

(Eatontown, N.J.) October 15, 2007 – DSCI announced today that it has consolidated its Information Assurance (IA) operations including advanced research & technology, product development, and engineering services within Science, Techniques, and Advanced Research Technologies, LLC (STAR Technologies, LLC – A DSCI Company), <http://www.startechnologies-usa.com>. STAR Technologies, LLC – A DSCI Company, which includes operations in Eatontown and New Brunswick, will function as the IA Division within DSCI's expanding Government Systems Group (GSG). As part of this consolidation, synergism across the various disciplines will facilitate quick-reaction development of unique solutions and expeditious deployment of innovative products to service government and commercial customers. STAR Technologies, LLC – A DSCI Company offers custom solutions, products, and technical services in the following areas:

- Identity Protection and Management
- Biometrics
- Surveillance
- Object Recognition
- Public Key Infrastructure (PKI)
- Security Engineering
- Software Separation
- Vulnerability
- Malicious Code
- Intrusion Detection
- Automated Response
- Certification and Accreditation (C&A)

According to DSCI's CEO, Steven A. DeChiaro, "this consolidation will create an environment that stimulates innovation, facilitates rapid prototyping, and streamlines product development/deployment as desired by our expanding customer base."
